OpenSesame

Efficient, Actionable and Convenient:
OpenSesame Integrations

A Training Team-Up

OpenSesame content is compatible with any standards-compliant learning management system (LMS) or learning experience platform (LXP), but our ability to directly integrate with those partner platforms have made the biggest impact for our customers. Automating essential tasks and finding actionable insights quickly allows you to focus on what matters most — supporting your learners.

We've partnered with many LMS and LXP providers to bring the freshest content to customers with minimal effort and maximum impact. While OpenSesame courses are compatible with any platform by uploading SCORM or AICC files, we currently have two types of automated integrations: **Direct Integration** and **Embedded Catalog**.

Learn more about how a seamless integration paired with our extensive course library helped Overhead Door build a successful learning program.

READ THE STORY

1
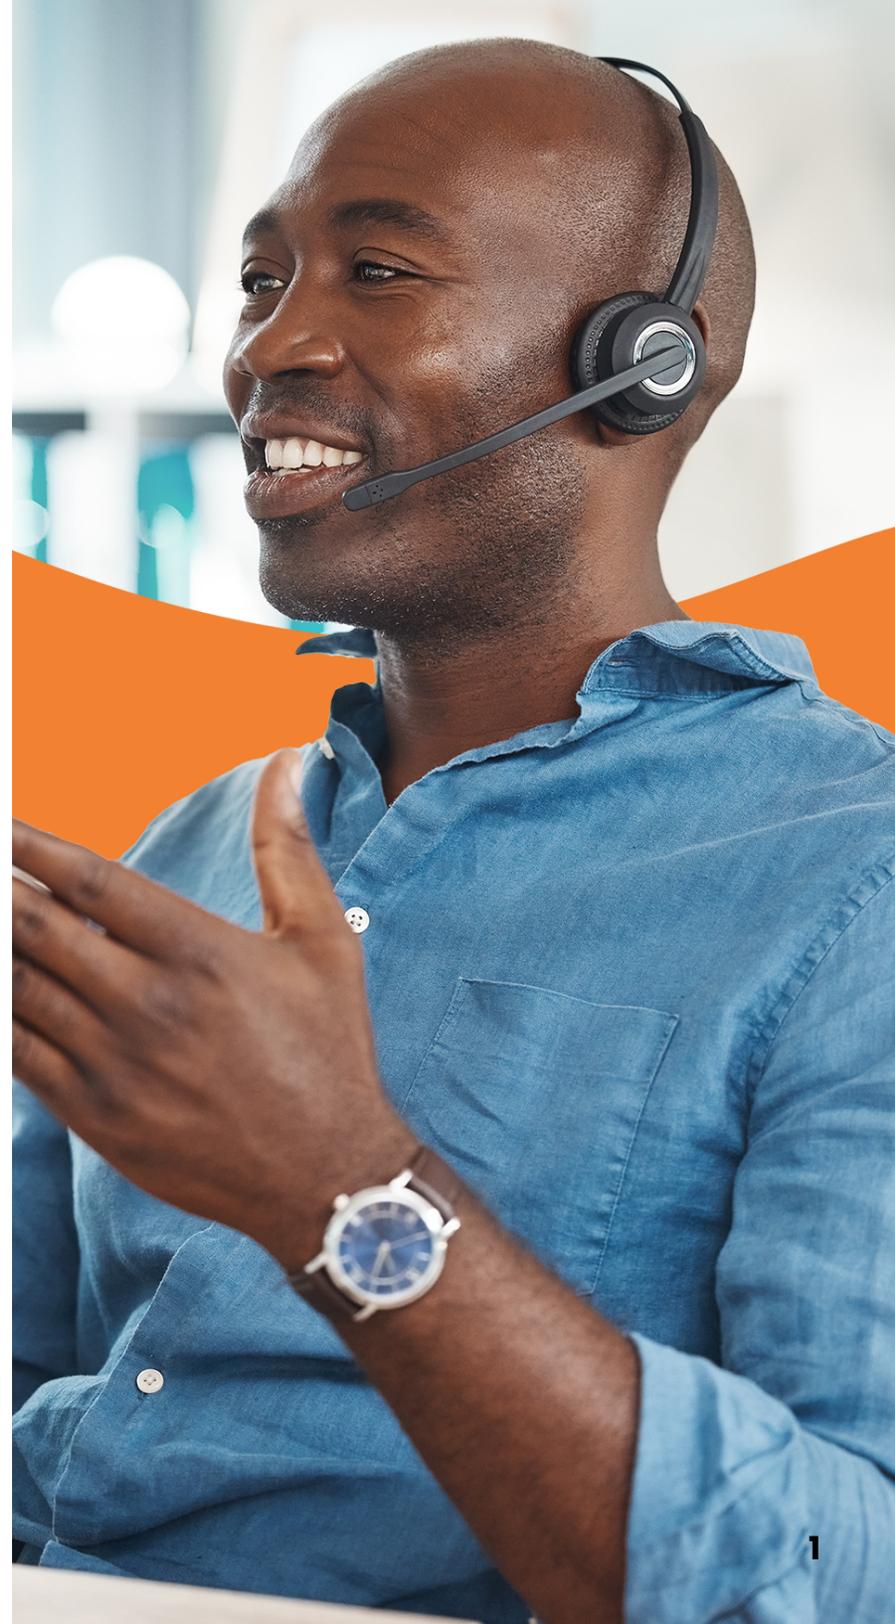

Direct Integration

A Direct Integration allows you to effortlessly send courses to your learning platform and monitor their status. When course modules are updated with new information, they can automatically push to your platform. You can also access real-time reporting for completion and engagement in OpenSesame's Insights Dashboard. Here are our partner platforms with whom we have a Direct Integration for course content.

360Learning · Blossom · cornerstone
degreed · disprz · edcast
engagedly · expertusone · GYRUS
INNOWORK PEOPLE AND PERFORMANCE · Knowledge anywhere · LEARNING
Microsoft · moodle · ONPOINT DIGITAL
ORACLE · SparkLearn · YOOBIC
sumtotal · THRIVE · Accord LMS
SAP SuccessFactors
TALENTQUEST · workday · infor

Embedded Catalog

An embedded catalog with OpenSesame allows you to conveniently browse and send courses within an iframe that's embedded within the learning platform. We're working with our partners to ultimately bring the functionalities that Direct Integration affords, but an Embedded Catalog removes the need for downloading and uploading SCORM and AICC files manually.

TRAINING

Why Integration Matters:

Find top-notch training faster

Our searchable catalog allows you to quickly filter and find what you need from more than 30,000 courses—with world class publishers and a variety of topics and industries. AI-driven lists and our team of expert curators are always available to help you find the perfect training, from a short video to a complete certification.

Why Integration Matters:

Serve courses seamlessly

Send courses from the OpenSesame catalog to your content library with just a few clicks. Direct Integration and Embedded Catalogs bypass the typical download/upload process and metadata updates are automatically synced daily.

The My Courses page in the OpenSesame catalog shows the status of all the modules in your library and allows for bulk adjustments as needed. Publisher updates can be pushed to learners and courses can be swapped as the organization's needs change—from a single dashboard.

Why Integration Matters:

Gather insights for data-driven improvements

Is your program evolving based on real data? Rich and meaningful metrics like course completion and learner engagement allow you to identify patterns in what's working well, what could be improved, and where to take your program next.
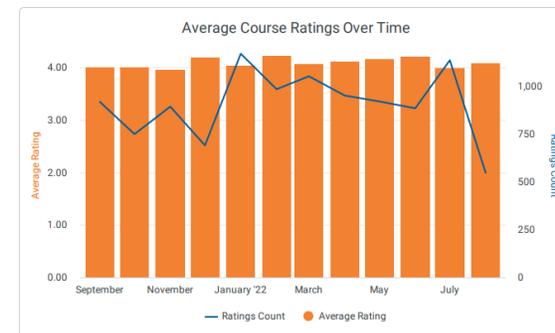

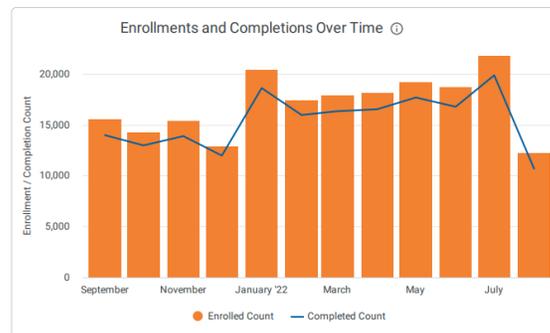

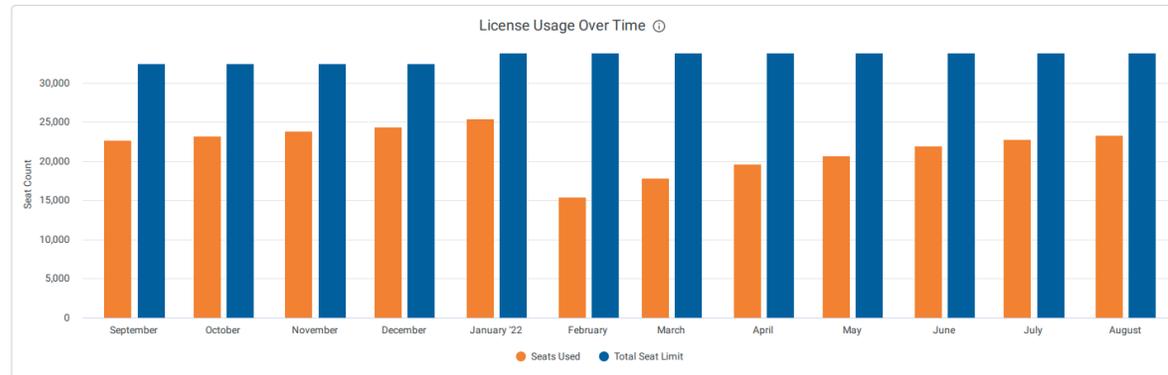

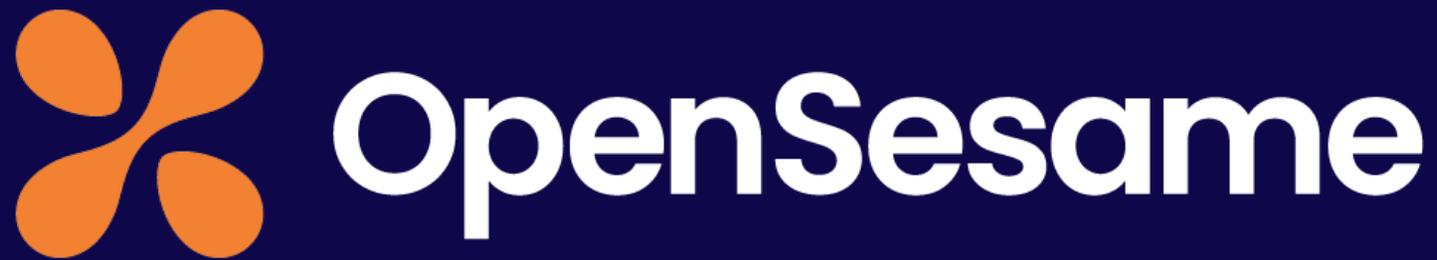

About OpenSesame

OpenSesame is more than a content provider—we work with our customers to help them build their most productive and admired workforces with L&D solutions that work for them. Our LMS and LXP partners are helping us remove barriers to efficiency so that learning programs are more manageable and your learners get what they need.
